# Viscon™

*Viscon is manufactured by GTAT California*

GTAT California is a subsidiary of Las Palmas Oil, Bakersfield CA 661-327-7451

## *A Cost-Effective Solution For Cleaner Air*

Viscon is a high-molecular weight, pure hydrocarbon polymer. Viscon is not a new "miracle" cure to engine exhaust. It has been in development for over 20 years. Initially it served as an agent to moderate the size, heat, volatility, and smoke emanating from jet fuel explosions. The Viscon diesel fuel product is a hybrid of the original polymer, modified to optimally enhance diesel fuel combustion.

Viscon is:

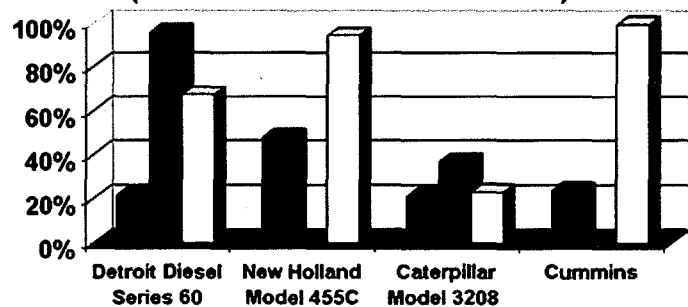

- Odorless
- Free from toxins
- Environmentally safe
- Free from carcinogens
- Free from all caustic materials

Viscon will:

- Improve torque
- Reduce emissions
- Improve air quality
- Improve fuel combustion
- Reduce fuel consumption
- Reduce engine temperatures

Cost: 3¢ per treated gallon.

**Emissions Test Results  
(Percent Emissions Reduction)**

(Particulate (PM) analysis was not performed on the New Holland and Cummins engines)

■ NOx ■ Particulate □ Hydrocarbon
